

Glass Width Calculation (30mm)

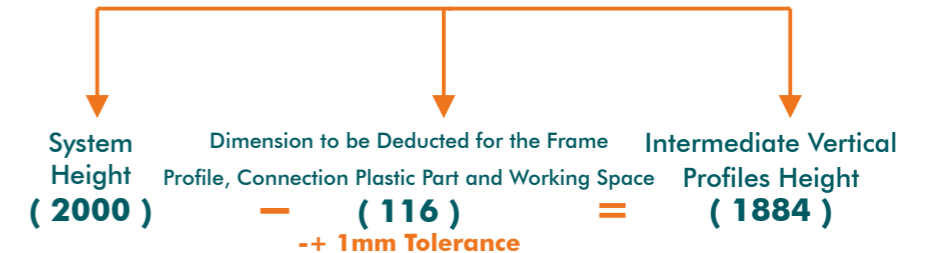

Glass Height Calculation (30mm)

Side Column Length Calculation

Intermediate Vertical Profiles Height

INFORMATION - NOTE

Angle Values to Be Taken For Frame Profile to Calculate Glass Width in Angled Balconies

- Deducted measure when using a 90 degree angle profile **42 mm** $\pm 1\text{mm}$ Tolerance
- Deducted measure when using a 135 degree angle profile **30 mm** $\pm 1\text{mm}$ Tolerance

When Using a Profile Compatible with Every Angle

→ System (Frame profile) Angles	91° - 120°	121° - 150°	151° - 179°	
→ Deducted measure	49 mm	36 mm	27 mm	$\pm 1\text{mm}$ Tolerance

Base Profile Calculation

The Dimension to be deducted from the glass For All Profiles from Right and Left is $16+16=32\text{mm}$ $\pm 1\text{mm}$ Tolerance
